

PFFA Exchange Traded Funds (ETF): The value of an ETF may be more volatile than the underlying portfolio of securities the ETF is designed to track. The costs of owning the ETF may exceed the cost of investing directly in the underlying securities. **Preferred Stock:** Preferred stocks may decline in price, fail to pay dividends, or be illiquid. **Non-Diversified:** The Fund is non-diversified and may be more susceptible to factors negatively impacting its holdings to the extent that each security represents a larger portion of the Fund's assets. **Short Sales:** The Fund may engage in short sales, and may experience a loss if the price of a borrowed security increases before the date on which the Fund replaces the security. **Leverage:** When a Fund leverages its portfolio, the value of its shares may be more volatile and all other risks may be compounded. **Derivatives:** Investments in derivatives such as futures, options, forwards, and swaps may increase volatility or cause a loss greater than the principal investment. **No Guarantee:** There is no guarantee that the portfolio will meet its objective. **Prospectus:** For additional information on risks, please see the Fund's prospectus.

PFFR Exchange-Traded Funds (ETF): The value of an ETF may be more volatile than the underlying portfolio of securities it is designed to track. The costs of owning the ETF may exceed the cost of investing directly in the underlying securities. **Preferred Stocks:** Preferred stocks may decline in price, fail to pay dividends, or be illiquid. **Real Estate Investments:** The Fund may be negatively affected by factors specific to the real estate market, including interest rates, leverage, property, and management. **Industry/Sector Concentration:** A Fund that focuses its investments in a particular industry or sector will be more sensitive to conditions that affect that industry or sector than a non-concentrated Fund. **Passive Strategy/Index Risk:** A passive investment strategy seeking to track the performance of the underlying index may result in the Fund holding securities regardless of market conditions or their current or projected performance. This could cause the Fund's returns to be lower than if the Fund employed an active strategy. **Correlation to Index:** The performance of the Fund and its index may vary somewhat due to factors such as Fund flows, transaction costs, and timing differences associated with additions to and deletions from its index. **Market Volatility:** Securities in the Fund may go up or down in response to the prospects of individual companies and general economic conditions. Price changes may be short or long term. **Prospectus:** For additional information on risks, please see the Fund's prospectus.

AMZA Exchange Traded Funds (ETF): The value of an ETF may be more volatile than the underlying portfolio of securities the ETF is designed to track. The costs of owning the ETF may exceed the cost of investing directly in the underlying securities. **MLP Interest Rates:** As yield-based investments, MLPs carry interest rate risk and may underperform in rising interest rate environments. Additionally, when investors have heightened fears about the economy, the risk spread between MLPs and competing investment options can widen, which may have an adverse effect on the stock price of MLPs. Rising interest rates may increase the potential cost of MLPs financing projects or cost of operations, and may affect the demand for MLP investments, either of which may result in lower performance by or distributions from the Fund's MLP investments. **Industry/Sector Concentration:** A fund that focuses its investments in a particular industry or sector will be more sensitive to conditions that affect that industry or sector than a non-concentrated fund. **Short Sales:** The Fund may engage in short sales, and may experience a loss if the price of a borrowed security increases before the date on which the Fund replaces the security. **Leverage:** When a Fund leverages its portfolio, the value of its shares may be more volatile and all other risks may be compounded. **Derivatives:** Investments in derivatives such as futures, options, forwards, and swaps may increase volatility or cause a loss greater than the principal investment. **MLPs:** Investments in Master Limited Partnerships may be adversely impacted by tax law changes, regulation, or factors affecting underlying assets. **No Guarantee:** There is no guarantee that the portfolio will meet its objective.

Performance Data: Performance data quoted backtested results. Backtested Performance was derived from the retroactive application of a model developed with the benefit of hindsight. Backtested performance is no guarantee of future results and current performance may be higher or lower than the performance shown. Investment return and principal value will fluctuate so your shares, when redeemed, may be worth more or less than their original cost. Please visit the fund webpages for performance data current to the most recent month-end and the Fund's standard performance information. You should consider the Fund's investment objectives, risks, charges and expenses carefully before investing.

For PFFA, PFFR, and AMZA funds, contact VP Distributors LLC at 1-888-383-4184 or visit www.virtusetfs.com to obtain a prospectus which contains this and other information about the Fund. The prospectus should be read carefully before investing. Virtus ETF Advisers, LLC serves as the investment advisor and Infrastructure Capital Advisers, LLC serves as the subadvisor to PFFA, PFFR and AMZA. These three funds are distributed by VP Distributors, LLC, member FINRA and subsidiary of Virtus Investment Partners, Inc. Past performance is not indicative of future results. The links to the fund fact sheets will provide standardized performance and risk disclosures.
